Focus Psychiatry Review By Deborah J. Hales, Mark Hyman Rapaport

FOCUS Psychiatry Review, Volume 2, contains 400 new board-type multiple-choice questions derived from material in the annual FOCUS Self-Assessment Examinations that can help psychiatrists prepare for examinations and identify areas for further study. These new questions, developed by the FOCUS Self-Assessment Editorial board, are consistent in form and process with the questions used by high-stakes examinations. They cover important clinical areas of psychiatric practice and closely follow the American Board of Psychiatry and Neurology (ABPN) outline of topics for the recertification examination in psychiatry. FOCUS Psychiatry Review is designed to test current knowledge and its clinical application. The workbook is flexible in format, allowing readers to use the educational approach that works best for them. Readers can review resource materials prior to answering questions, or they can use the workbook to review the references listed in the critiques after scoring test sections. The workbook will be useful for anyone committed to lifelong learning in the field practicing psychiatrists, psychiatric residents, and psychiatrists preparing for examinations. APA is accredited by ACCME to provide continuing medical education for physicians. APA designates this educational activity for a maximum of 50 AMA PRA Category 1 Credits™. Physicians should claim credit commensurate with the extent of their participation in the activity. Program start date: February 2011 Program end date: February 2014

Editorial Review

Review

"This is a great resource if the purpose of this purchase is to prepare well for Psychiatry MOC exam. It is concise. To the point and the questions really help to brush up all the brushing up that is needed to update your knowledge. It addresses all the areas in the field of Psychiatry that are relevant, pertinent to a practicing clinician. Its main emphasis is on updates in psychopharmacology, dementia and related conditions, clinical advances in treatment of substance abuse/dependence, and HIV related issues etc. It, however also does not neglect psychotherapy advances in treating myriad psychiatric disorders. It does not waste your time and energy on topics that make very little or no appearance on the MOC exam in Psychiatry (Child and Adolescent Psychiatry, Neurology, Neuroanatomy and Neuro-imaging, Molecular Biology... etc). If there is a need for further clarification on a particular topic, PRN use of Kaplans' "Synopsis of Psychiatry" should suffice. It also has the added bonus of earning 40 Category A CME Credits at no additional cost. That makes it a financially sound investment in addition to being an almost, "all you need" resource to prepare and succeed in Psychiatry MOC exam."-- "FA Dalpina, Amazon Reviewer", "July 29, 2011"

From the Back Cover

"If you're like me and prefer active to passive learning, American Psychiatric Publishing's *FOCUS Psychiatry Review* provides an innovative and enjoyable pathway for learning and reviewing key topics in contemporary clinical psychiatry. Each of the multiple choice options is discussed in detail, so learners are taught why answers are correct or incorrect. Ideally suited for those reviewing for American Board of Psychiatry and Neurology certification and recertification examinations, these exercises also offer engaging ways for all psychiatrists and other mental health practitioners to stay up-to-date."--*Joel Yager, M.D., Professor and Vice Chair for Education and Academic Affairs, University of New Mexico School of Medicine; Professor Emeritus, Department of Psychiatry and Biobehavioral Sciences, David Geffen School of Medicine, University of California at Los Angeles*

"*FOCUS Psychiatry Review* is a comprehensive set of questions that covers all main topics of psychiatric practice. It is an excellent set of practice questions for the now routine ABPN recertification test that psychiatrists are required to take. In addition to its brief but informative explanation of the best answer to each question, it also provides a good list of additional resources for further study. Every question has current references, from the last 10-15 years, for review and some are quite extensive. For instance, question 48 about chronic severe major depression cites 8 published articles for further review that include both national and international literature. This is a thorough review that will be an excellent resource for current information to both established and newly trained psychiatrists."--*Michele T. Pato, M.D., Associate Dean of Academic Scholarship and Professor of Psychiatry, Keck School of Medicine, University of Southern California; Research Professor, Washington, D.C. Veterans Hospital; and Professor, SUNY Upstate.*

"Drs. Hales and Rapaport and their Editorial Board have once again shown *FOCUS* to be the premier lifelong learning instrument in psychiatry. With questions from genetics to dealing with interpreters in the clinical setting, this review will help us all dig deeper for the science and the subtleties that make our profession unique and great."--*Richard K. Harding, M.D., Professor and Chair, Department of Neuropsychiatry and Behavioral Science, University of South Carolina School of Medicine, Columbia, South Carolina*

Users Review

From reader reviews:

Henry Evans:

Information is provisions for folks to get better life, information presently can get by anyone with everywhere. The information can be a information or any news even restricted. What people must be consider any time those information which is inside former life are challenging to be find than now is taking seriously which one is suitable to believe or which one the resource are convinced. If you get the unstable resource then you have it as your main information you will see huge disadvantage for you. All those possibilities will not happen with you if you take Focus Psychiatry Review as your daily resource information.

Michael Stanford:

Spent a free time to be fun activity to complete! A lot of people spent their sparetime with their family, or their own friends. Usually they doing activity like watching television, gonna beach, or picnic from the park. They actually doing same task every week. Do you feel it? Will you something different to fill your current free time/ holiday? Might be reading a book may be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to attempt look for book, may be the publication untitled Focus Psychiatry Review can be excellent book to read. May be it might be best activity to you.

Harvey Sanchez:

People live in this new morning of lifestyle always aim to and must have the spare time or they will get lot of stress from both everyday life and work. So , if we ask do people have time, we will say absolutely of course. People is human not really a huge robot. Then we ask again, what kind of activity do you have when the spare time coming to a person of course your answer will certainly unlimited right. Then ever try this one, reading books. It can be your alternative throughout spending your spare time, the actual book you have read is Focus Psychiatry Review.

Shantel McCary:

Your reading sixth sense will not betray you, why because this Focus Psychiatry Review guide written by well-known writer who knows well how to make book that can be understand by anyone who read the book. Written within good manner for you, still dripping wet every ideas and producing skill only for eliminate

your current hunger then you still question Focus Psychiatry Review as good book but not only by the cover but also through the content. This is one e-book that can break don't evaluate book by its deal with, so do you still needing an additional sixth sense to pick that!? Oh come on your reading sixth sense already told you so why you have to listening to a different sixth sense.
