Multidisciplinary Care of Urinary Incontinence: A Handbook for Health Professionals From Springer

Multidisciplinary Care of Urinary Incontinence - a Handbook for Health Professionals effectively uses a multidisciplinary approach to assist health professionals in their care of patients with urinary incontinence. It is recognized that the best outcomes are achieved by a multidisciplinary team approach especially with regard to complex cases and care of the elderly.

This book is written by expert authors from around the world with a wealth of experience in conducting clinics on pelvic floor, aged care voiding dysfunction and neuro-rehabilitation. The text is illustrated throughout and contains case-studies with input and practical tips from the different health disciplines at each point. Each chapter concludes with a list of seminal publications and web-based resources to assist the reader in the clinical environment.

Multidisciplinary Care of Urinary Incontinence - a Handbook for Health Professionals is of benefit to medical and allied health disciplines including family physicians, nurses, urologists, gynecologists, physiotherapists, geriatricians, neurologists and rehabilitation specialists.

Editorial Review

Review

From the reviews:

“Fifteen contributors from disciplines involved in continence care have written this concise, but comprehensive, handbook intended as a resource for all health care professionals looking after patients with urinary incontinence. ... This handbook does very well in what it sets out to achieve: a well-presented, clear resource of current assessment and management of urinary incontinence. Its key feature is the direct clinical relevance of its layout of the topic chapters which are informative, easy to read and extremely well illustrated.” (Hugh Greenland, Australian and New Zealand Continence Journal, Vol. 19 (3), 2013)

From the Back Cover

Multidisciplinary Care of Urinary Incontinence - a Handbook for Health Professionals effectively uses a multidisciplinary approach to assist health professionals in their care of patients with urinary incontinence. It is recognized that the best outcomes are achieved by a multidisciplinary team approach especially with regard to complex cases and care of the elderly.

This book is written by expert authors from around the world with a wealth of experience in conducting clinics on pelvic floor, aged care voiding dysfunction and neuro-rehabilitation.
