About the Author

Computer developer turned author, Byron Francis graduated from university in Colorado with a degree in Computer Science & Engineering. As a child of the '80's growing up in the computer age, technology enthusiast he was always destined to follow this career path, although he did consider teaching software development, before being offered a job at a software house in Denver. Working as a developer, he gained extensive knowledge of computer programming languages working for clients across the globe, and progressed to deliver training, to colleagues and to the end users on writing programmes and using the software. To facilitate his training delivery, he began writing manuals on topics such as Linux, Raspberry Pi 3 and SQL, which proved very popular among his colleagues and so he published them to the wider public. He also writes articles for an online magazine, reviewing new apps and software releases. As Head of Development for the company, he started his career with, Byron now spends less time travelling and more time based in Colorado, where he lives with his wife and their two dogs. The Francis's like to spend their weekends away from the city trekking or camping, and are both keen horse riders. Make sure to click "Follow" on my author's page to follow my new releases

From reader reviews:

Barbara Marburger:

Nowadays reading books become more and more than want or need but also get a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge even the information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want drive more knowledge just go with education books but if you want experience happy read one using theme for entertaining for example comic or novel. The Arduino : The Complete Beginner's Guide is kind of guide which is giving the reader unstable experience.

Gregory Mackenzie:

Information is provisions for those to get better life, information these days can get by anyone at everywhere. The information can be a knowledge or any news even a concern. What people must be consider if those information which is inside former life are hard to be find than now could be taking seriously which one is suitable to believe or which one often the resource are convinced. If you receive the unstable resource then you understand it as your main information we will see huge disadvantage for you. All of those possibilities will not happen with you if you take Arduino : The Complete Beginner's Guide as your daily resource information.
