Embedded Systems By B. Kanta Rao

Designed as a textbook for the undergraduate students of electronics and communication engineering, electronics and instrumentation engineering, computer science and engineering, information communication technology as well as for the postgraduate students of computer applications (MCA), it lays the foundation for all readers on all possible applications of embedded processors.

This text deals with some of the interesting processors that will enlighten the need for new instructions and fast program implementation. The processors covered are the classic 8051 family, ATmega family, PIC family and Texas 430 family along with a good introduction to ARM processors.

KEY FEATURES

- Well designed hardware–software integrated programs and exercises
- Examples for each processor instruction set
- Extensive discussion on classic 8051 family including all recent developments
