Raising Cats Naturally: How to care for your cat the way nature intended

By Michelle T. Bernard

It's about time we had a book like this. Michelle Bernard has a rare gift for putting in plain words extraordinarily effective and levelheaded ways to properly care for cats. Steering clear of faddish, dangerous trends-and dissecting the oodles of misinformation that has regrettably become the norm in mainstream advice on animal nutrition-she shines most conspicuously on the issue of a proper feline diet. By giving the reader a common-sense, straightforward strategy for preparing a diet that is based solely on the nutritional requirements of true carnivores, her book is a must-have for anyone committed to building and maintaining glowing good health for cats. Bernard's work on all aspects of caring naturally for cats is based on years of meticulous research and hands-on experience, yet she translates her knowledge into simple, common sense guidelines that anyone can understand and put to use. Her eloquent explanation of homeopathy demystifies this splendid, ancient healing art that is so marvelously suited to cats, giving the reader a valuable awareness about how to build and nurture a cat's health from the inside out. This alone is a refreshing and most welcome approach given the routine over-medication and over-vaccination of cats. If you love your cat, read this book. All of it.
