## Environmental Toxicology: Biological and Health Effects of Pollutants, Second Edition By Ming-Ho Yu, Humio Tsunoda

An Indispensable Reference of Air, Soil, and Water Pollutants

This second edition of **Environmental Toxicology** focuses on the biological and health effects toxins have on living organisms. It also stresses the relationship between human activity and the environment, relating changes in the environment with the changing patterns of human diseases, and exploring the parallels between developing economies and pollution-related health problems.

The book deals with a large number of environmental toxicants, discussing their damage process, metabolism (biotransformation), and metabolism, toxicants and their damage process, and environmental, biological, and nutritional factors that may influence toxicity. It also describes several natural defense systems and the mechanisms for detoxification, including endogenous antioxidants and free radical scavenging enzymes on a cellular level. The book continues its comprehensive analysis of EPA Criteria Air Pollutants (SO<sub>2</sub>, NO<sub>2</sub>, O<sub>3</sub>, CO, particulate matter), and volatile organic compounds, as well as soil and water pollution, and expands the chapters on fluoride, environmental metals and metalloid (lead, cadmium, mercury, nickel, and arsenic), pesticides and related material such as PCBs and dioxins, and their relationship with endocrine disruption (a new chapter) and environmental cancer, offering more insight on the interaction of various chemical agents with DNA.

Based on research from nearly 30 years of teaching environmental toxicology and related courses, the author concludes this text with an introduction to ecological risk assessment and its role in regulation and policymaking.

### **Editorial Review**

#### Review

..."an organized and highly readable text...fills an important void the only published book to-date that is oriented for use as a basic introductory text...Overall this book will be of value to beginning students and to research investigators as a reference tool." - Gary M. Rand, Florida International University, SETAC News, May 1999

### **Users Review**

#### **From reader reviews:**

#### **Scott Ridgway:**

Do you have favorite book? When you have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each book has different aim or even goal; it means that book has different type. Some people feel enjoy to spend their a chance to read a book.
