Hostile Intent and Counter-Terrorism: Human Factors Theory and Application (Human Factors in Defence) By Glyn Lawson

This volume presents world-leading ideas and research that explores some of the most prominent topics relevant to detecting terrorism. The book is divided into six key themes: conceptualising terrorism, deception and decision making, social and cultural factors in terrorism, modelling hostile intent, strategies for counter-terrorism, and future directions. Twenty two chapters cover the spectrum of detecting terrorist activities, hostile intent, crowded public spaces and suspicious behaviour. The work draws from high impact research findings and presents case-studies to help communicate concepts. Specific areas of interest include methodological issues in counter-terrorism, counter terrorism policy and its impact on end users, novel research methods and innovative technologies in counter-terrorism. A variety of disciplines are represented by this work, including: ergonomics/human factors, psychology, criminology, cognitive science, sociology, political theory, art/design, engineering and computer science. This book not only expands the knowledge base of the subject area and is therefore of prime relevance to researchers investigating counter-terrorism, but provides a valuable resource to security stakeholders at policy and practitioner levels.

Editorial Review

Review

'This book has an important contribution to make to those seeking to develop counter-terrorism policy and practices informed by evidence-based scholarship. It contains a diverse set of reflections from around the world, inspired by a group of researchers who initially came together to consider ways of developing robust, reliable and ethical ways of detecting the covert activities of terrorists in crowded places. This book illustrates, in its scale and scope, the size and complexity of the challenge.' Tristram Riley-Smith, University of Cambridge, UK 'The essays in this book provide an original set of insights into the genesis of terrorism and its actors. The exploration of terrorist psychology goes well beyond any legal textbook. Historical analysis is combined with demographic examination. Those who detect, disrupt and research terrorism on behalf of the public will find new and revealing material that provides important background for their work.' Lord Carlile of Berriew CBE QC, former independent reviewer of terrorism legislation 'In this insightful and incisive text, Stedmon, Lawson and their many colleagues and co-contributors grapple with one of the most pressing issues for our species and our survival on this planet. They undertake to show how the integration of people and technology is at once the genesis of and potential solution to the vexed problems of contemporary asymmetric conflict, expressed through terrorism. But more than this, their crucial collective deliberations mandate that we consider what our future society can and should look like. These are issues at the very heart of the human enterprise. Thus, while both a timely and important text for the declared central concern for counter-terrorism and the place of human factors and ergonomics in that struggle, their work forces us to examine the inherent sub-text which asks and addresses persistent and perennial questions about the individual and their place in a communal and technologically-driven society. Accessible to the general reader, yet of great value to the involved professional, this text is one that must be widely read in order that we understand what threats surround us and what avenues we all possess to resolve them.' Peter A. Hancock, University of Central Florida, USA

About the Author

Dr Alex W Stedmon FIEHF CPsychol CSci FRSA is a Chartered Psychologist, Fellow of the Institute of Ergonomics and Human Factors and Fellow of the Royal Society of Arts. He is a Reader in Human Factors at Coventry University. He worked for the Ministry of Defence before moving into academia and explores human factors issues of technology use in security applications as well as contextual methods for investigating suspicious behaviours in various security related domains. Alex was one of the technical leads for a strategic security consortium (EPSRC project: 'Shades of Grey') and received Centre for Defence Enterprise funding for projects on: human factors of automated CCTV; identifying human pheromones associated with deception; and collaborative intelligence information gathering. Alex has co-edited special issues of 'Applied Ergonomics' (44/2013: 'Detecting terrorist activities: Hostile intent and suspicious behaviours') and 'The Journal of Police & Criminal Psychology' (28(2)/2013: 'Terrorism psychology: Theory and application'). Dr Glyn Lawson FIEHF - is a Lecturer within the Faculty of Engineering and a member of the Human Factors Research Group at The University of Nottingham. His research expertise includes the human-centred development of new technologies in design and engineering applications. Glyn has particular expertise in the evaluation of methods for predicting behaviour in emergency situations. He has also conducted research on deception detection and worked on requirements capture within the Security domain. Glyn is a Fellow of the Institute of Ergonomics and Human Factors and sits on the Education and Training panel. Glyn also co-edited the special issues of 'Applied Ergonomics' and 'The Journal of Police & Criminal Psychology' focusing on detecting terrorist activities and terrorism psychology.

From reader reviews:

Donovan Pena:

The feeling that you get from Hostile Intent and Counter-Terrorism: Human Factors Theory and Application (Human Factors in Defence) could be the more deep you rooting the information that hide into the words the more you get serious about reading it. It doesn't mean that this book is hard to comprehend but Hostile Intent and Counter-Terrorism: Human Factors Theory and Application (Human Factors in Defence) giving you excitement feeling of reading. The article author conveys their point in particular way that can be understood simply by anyone who read it because the author of this e-book is well-known enough. This specific book also makes your vocabulary increase well. That makes it easy to understand then can go to you, both in printed or e-book style are available. We suggest you for having this Hostile Intent and Counter-Terrorism: Human Factors Theory and Application (Human Factors in Defence) instantly.

Calvin Fischer:

The book Hostile Intent and Counter-Terrorism: Human Factors Theory and Application (Human Factors in Defence) will bring that you the new experience of reading any book. The author style to spell out the idea is very unique. In case you try to find new book to read, this book very suitable to you. The book Hostile Intent and Counter-Terrorism: Human Factors Theory and Application (Human Factors in Defence) is much recommended to you you just read. You can also get the e-book from official web site, so you can more easily to read the book.

Peter Wright:

Playing with family within a park, coming to see the ocean world or hanging out with pals is thing that usually you might have done when you have spare time, subsequently why you don't try point that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Hostile Intent and Counter-Terrorism: Human Factors Theory and Application (Human Factors in Defence), you may enjoy both. It is fine combination right, you still want to miss it? What kind of hangout type is it? Oh come on its mind hangout fellas. What? Still don't have it, oh come on its named reading friends.

Priscilla McNeil:

Beside this particular Hostile Intent and Counter-Terrorism: Human Factors Theory and Application (Human Factors in Defence) in your phone, it can give you a way to get more close to the new knowledge or details. The information and the knowledge you will got here is fresh through the oven so don't become worry if you feel like an outdated people live in narrow small town. It is good thing to have Hostile Intent and Counter-Terrorism: Human Factors Theory and Application (Human Factors in Defence) because this book offers for you readable information. Do you occasionally have book but you do not get what it's exactly about. Oh come on, that wil happen if you have this in the hand. The Enjoyable arrangement here cannot be questionable, like treasuring beautiful island. So do you still want to miss this? Find this book as well as read

it from currently!
