The Industrial Communication Technology Handbook (Industrial Information Technology) From Brand: CRC Press

The Industrial Communication Technology Handbook focuses on current and newly emerging communication technologies and systems that are evolving in response to the needs of industry and the demands of industry-led consortia and organizations.

Organized into two parts, the text first summarizes the basics of data communications and IP networks, then presents a comprehensive overview of the field of industrial communications. This book extensively covers the areas of fieldbus technology, industrial Ethernet and real-time extensions, wireless and mobile technologies in industrial applications, the linking of the factory floor with the Internet and wireless fieldbuses, network security and safety, automotive applications, automation and energy system applications, and more.

The Handbook presents material in the form of tutorials, surveys, and technology overviews, combining fundamentals and advanced issues with articles grouped into sections for a cohesive and comprehensive presentation. The text contains 42 contributed articles by experts from industry and industrial research establishments at the forefront of development, and some of the most renowned academic institutions worldwide. It analyzes content from an industrial perspective, illustrating actual implementations and successful technology deployments.

Editorial Review

About the Author

Richard Zurawski, M.Eng, Ph.D, IEEE fellow, is with ISA Group, USA. He has over 35 years of academic and industrial experience, including a regular professorial appointment at the University of Tokyo, Japan. Since 1998, Dr. Zurawski has been involved in entrepreneurial activities in Silicon Valley. He co-founded three Silicon Valley-based hi-tech companies. A recipient of the IEEE Anthony J. Hornfeck Service Award and the Rector Medal from AGH University of Science & Technology, Dr. Zurawski served as vice president of the IEEE Industrial Electronics Society, and on the steering committee of the *IEEE Journal of Microelectromechanical Systems*. He has edited two book series and six major handbooks, as well as served as editor in chief of *IEEE Transactions on Industrial Informatics*, and editor at large, associate editor, and guest editor of many prestigious journals.

Users Review

From reader reviews:

Vera Velez:
