Bone Marrow Pathology By Barbara J. Bain, David M. Clark, Bridget S. Wilkins

Bone Marrow Pathology has been extensively revised to reflect the significant advances which have occurred in the application of cytogenetics and in particular, molecular genetics in the diagnosis, classification and understanding of haematological disorders. This comprehensive book not only provides information on all common disease entities, but also covers rare disorders in which bone marrow examination is useful. It is designed as practical resource with 'Problems and Pitfalls' sections throughout to aid laboratory diagnosis.

This fourth edition:

- Incorporates the recommendations of the 2008 WHO Classification of Tumours of Haematopoietic and Lymphoid Tissues
- Covers key diagnostic techniques such as flow cytometric immunophenotyping, immunohistochemistry and cytogenetic and molecular genetic analysis
- Includes new diagnostic algorithms and summary boxes
- Contains 550 colour illustrations including high-quality digital photomicrographs

Haematologists and histopathologists will find this book an invaluable desktop reference when performing daily blood and bone marrow investigations.

Editorial Review

Review

"This book is excellent. Haematopathology can be daunting and the study of bone marrows especially so. The authors deserve credit for producing a book that is not only easy to read and understand, but is also a compact, detailed and exhaustive guide. I would highly recommend it to trainees and consultants in haematology and histopathology alike. Each and every department that reports bone marrows should have it in their library, preferably within easy reach." (*ACP News*, December 2010)

"This is one of only a few references that effortlessly integrate the entire process critical for accurate bone marrow interpretation. It is a must for practicing hematopathologists." (*Doody's*,

"Trainee medical and laboratory staff in haematology and histopathology will all derive great benefit from using this publication to aid their studies. The logical approach, concise text, and abundance of illustrations make this book an important addition to any reading list used as preparation for examinations. In short, this is a seriously good book!" (*The Bulletin of the Royal College of Pathologists*, July 2010)

"Bone Marrow Pathology is illustrated very well and contains clear and straightforward description of the broad spectrum of bone marrow pathology. The book is of huge value for histopathologists and hematologists practicing bone marrow diagnostics." (*Hematological Oncology*, February 2010)

From the Back Cover

Bone Marrow Pathology has been extensively revised to reflect the significant advances which have occurred in the application of cytogenetics and in particular, molecular genetics in the diagnosis, classification and understanding of haematological disorders. This comprehensive book not only provides information on all common disease entities, but also covers rare disorders in which bone marrow examination is useful. About the Author

Barbara J. Bain, MBBS, FRACP, FRCPath

Professor of Diagnostic Haematology, St Mary's Hospital Campus of Imperial College, Faculty of Medicine,

Imperial College, London and Honorary Consultant Haematologist, St Mary's Hospital, London, UK

David M. Clark, MD, MRCP(UK), FRCPath

Consultant Histopathologist, Path Links, N Lincolnshire and Goole Hospitals NHS Foundation Trust;
Honorary Consultant Histopathologist, Nottingham University Hospitals, and Special Lecturer in Pathology,
University of Nottingham, UK

Bridget S. Wilkins, DM, PhD, FRCPath

Consultant in Haematopathology, Guy's and St Thomas' Hospitals NHS Foundation Trust, London;
Honorary Senior Lecturer in Haematopathology, King's College, London

Users Review

From reader reviews:

Deborah Green:

What do you concerning book? It is not important with you? Or just adding material when you really need something to explain what your own problem? How about your spare time? Or are you busy man or woman? If you don't have spare time to complete others business, it is make one feel bored faster. And you have time? What did you do? Every person has many questions above. They must answer that question since just their can do in which. It said that about publication. Book is familiar in each person. Yes, it is appropriate. Because start from on jardín de infancia until university need this particular Bone Marrow Pathology to read.

Glen Hoffman:

Your reading sixth sense will not betray an individual, why because this Bone Marrow Pathology publication written by well-known writer who knows well how to make book that may be understand by anyone who all read the book. Written with good manner for you, still dripping wet every ideas and publishing skill only for eliminate your current hunger then you still uncertainty Bone Marrow Pathology as good book but not only by the cover but also by the content. This is one guide that can break don't ascertain book by its protect, so do you still needing yet another sixth sense to pick this specific!? Oh come on your studying sixth sense already alerted you so why you have to listening to another sixth sense.

Donald Farrell:

The book untitled Bone Marrow Pathology contain a lot of information on this. The writer explains your girlfriend idea with easy way. The language is very easy to understand all the people, so do not necessarily worry, you can easy to read this. The book was authored by famous author. The author brings you in the new period of time of literary works. You can read this book because you can keep reading your smart phone, or product, so you can read the book in anywhere and anytime. If you want to buy the e-book, you can available their official web-site and order it. Have a nice learn.

Francis Lopez:

As a college student exactly feel bored to be able to reading. If their teacher asked them to go to the library in order to make summary for some book, they are complained. Just minor students that has reading's heart and soul or real their hobby. They just do what the professor want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that examining is not important, boring and can't see colorful images on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Bone Marrow Pathology can make you really feel more interested to read.
