Marine Aquarium Handbook: Beginner to Breeder By Martin A. Moe

The Marine Aquarium Handbook is the bestselling saltwater aquarium book of all time, selling more than 250,000 copies since first published in 1982 and launching aspiring aquarists into the marine aquarium hobby. Out of print since 2006, this indispensable resource is now available in a completely updated and redesigned third edition that includes world-class color photography to help guide the reader through setup of their first marine aquarium and then progresses to reefkeeping and breeding of marine fishes. Written by an acclaimed marine biologist and pioneering fish and invertebrate breeder, the book provides sound advice in a clear, readable, and engaging voice. New content exclusive to this edition includes recent advances in biofiltration and energy-efficient lighting, brand new chapters on marine foods and refugia, greatly expanded coverage of fish species and hardy invertebrate species, and information about those species best suited for breeding. Each featured fish has a species profile, behavior notes, native range, maximum size, and essential feeding and husbandry advice. The Marine Aquarium Handbook covers everything a marine hobbyist needs to know to get started and be successful, including aquarium choices, water chemistry, filtration, biological filtration and live rock, setup and maintenance, fish selection, and identification and treatment of common diseases.

Editorial Review

About the Author

MARTIN MOE began breeding marine fish in 1969 and has since reared over 35 species of saltwater tropical species. He was the first to breed Indo-Pacific clownfish commercially and the first to breed Atlantic marine angelfish. For his service to the hobby, Martin has been recognized by the Marine Aquarium Societies of North America with their coveted Lifetime Achievement Award. He lives in Florida.

Users Review

From reader reviews:

Richard Riggins:
