Lecture Notes on Functional Analysis: With Applications to Linear Partial Differential Equations (Graduate Studies in Mathematics) By Alberto Bressan

This textbook is addressed to graduate students in mathematics or other disciplines who wish to understand the essential concepts of functional analysis and their applications to partial differential equations. The book is intentionally concise, presenting all the fundamental concepts and results but omitting the more specialized topics. Enough of the theory of Sobolev spaces and semigroups of linear operators is included as needed to develop significant applications to elliptic, parabolic, and hyperbolic PDEs. Throughout the book, care has been taken to explain the connections between theorems in functional analysis and familiar results of finite-dimensional linear algebra. The main concepts and ideas used in the proofs are illustrated with a large number of figures. A rich collection of homework problems is included at the end of most chapters. The book is suitable as a text for a one-semester graduate course.

Editorial Review

Users Review

From reader reviews:

Derrick Robertson:

Nowadays reading books be a little more than want or need but also be a life style. This reading routine give you lot of advantages. Advantages you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want drive more knowledge just go with training books but if you want truly feel happy read one using theme for entertaining such as comic or novel. The Lecture Notes on Functional Analysis: With Applications to Linear Partial Differential Equations (Graduate Studies in Mathematics) is kind of book which is giving the reader unpredictable experience.

Shirley Jones:

Do you have something that that suits you such as book? The publication lovers usually prefer to pick book like comic, brief story and the biggest some may be novel. Now, why not hoping Lecture Notes on Functional Analysis: With Applications to Linear Partial Differential Equations (Graduate Studies in Mathematics) that give your satisfaction preference will be satisfied by simply reading this book. Reading routine all over the world can be said as the method for people to know world much better then how they react in the direction of the world. It can't be said constantly that reading behavior only for the geeky particular person but for all of you who wants to always be success person. So , for all of you who want to start studying as your good habit, you could pick Lecture Notes on Functional Analysis: With Applications to Linear Partial Differential Equations (Graduate Studies in Mathematics) become your starter.

Patricia Glover:

Many people spending their time frame by playing outside together with friends, fun activity together with family or just watching TV 24 hours a day. You can have new activity to pay your whole day by examining a book. Ugh, do you think reading a book can actually hard because you have to take the book everywhere? It okay you can have the e-book, getting everywhere you want in your Mobile phone. Like Lecture Notes on Functional Analysis: With Applications to Linear Partial Differential Equations (Graduate Studies in Mathematics) which is keeping the e-book version. So , try out this book? Let's see.

James Hudson:

In this particular era which is the greater man or who has ability in doing something more are more precious than other. Do you want to become one of it? It is just simple approach to have that. What you need to do is

just spending your time almost no but quite enough to experience a look at some books. On the list of books in the top listing in your reading list is actually Lecture Notes on Functional Analysis: With Applications to Linear Partial Differential Equations (Graduate Studies in Mathematics). This book and that is qualified as The Hungry Hills can get you closer in becoming precious person. By looking way up and review this book you can get many advantages.
